PERSONAL PROJECTS

LandingPageCopywriter — SvelteKit, Firebase, Groq

https://www.landingpagecopywriter.live

An AI wrapper to copy write the landing page of a startup made using SvelteKit, auth with Firebase and with Groq's AI Interface provided as a micro-service via pythonanywhere.

Scrolless — SvelteKit

Chrome Web Store page

A chrome extension that helps with a daily limit of social media usage, built using JavaScript on top of the Chrome Extensions API.

Feedbackr — Java SpringBoot, MongoDB, Stripe

https://www.feedbackr.live

A handy web application that provides a way for business owners to collect feedback from their customers through a custom link, built using SpringBoot and storing User Data into a MongoDB, was a pain in the ass, never used SpringBoot since then... :)

Live Web Space — SvelteKit, Redis and Websocket

https://github.com/iInvisibilities/live-web-space

Implementing a WebSockets-based communication between the users, WebSocket Server and the SvelteKit Server with a secure hierarchical structure which assures secure event-handling, this app enables users to create a session with a shareable link, allowing other users to join and see real-time HTML changes that occur on the session' creator.

Product Listing — SvelteKit, MongoDB

https://github.com/iInvisibilities/product-listing

A very clichéd CRUD shop-listings SvelteKit web application that stores data using MongoDB and implements a real-time search and skimming through products capability.

PERSONAL PROJECTS CURRENTLY WORKING ON (PART-TIME)

ODCrypto Shop — SvelteKit, Redis, MySQL, Memcached, Kafka, BitPay

https://github.com/iInvisibilities/odcrypto.shop

An online market, housing digital goods and content for buyers, allows sellers to anonymously put items on sale powered by crypto transactions.
